

# **Working on AnIML - A View from a Vendor's Representative**

**Dr. Maren Fiege**  
**Waters GmbH**

# Overview

- History + Involvement
- Why standard formats?
- Challenges
- Benefits

# History

- September 2002: exploratory meeting
- March 2003: E13.15 set up
- April 2003: First AnIML working group meeting
- Workshops at PittCon
  - 2006 through 2013
- Expedited Project Proposal and gathering of funds – late 2010
  - Agilent Technologies
  - Amgen
  - Glaxo SmithKline
  - PerkinElmer
  - Waters Corporation
- Documentation contract awarded late 2012

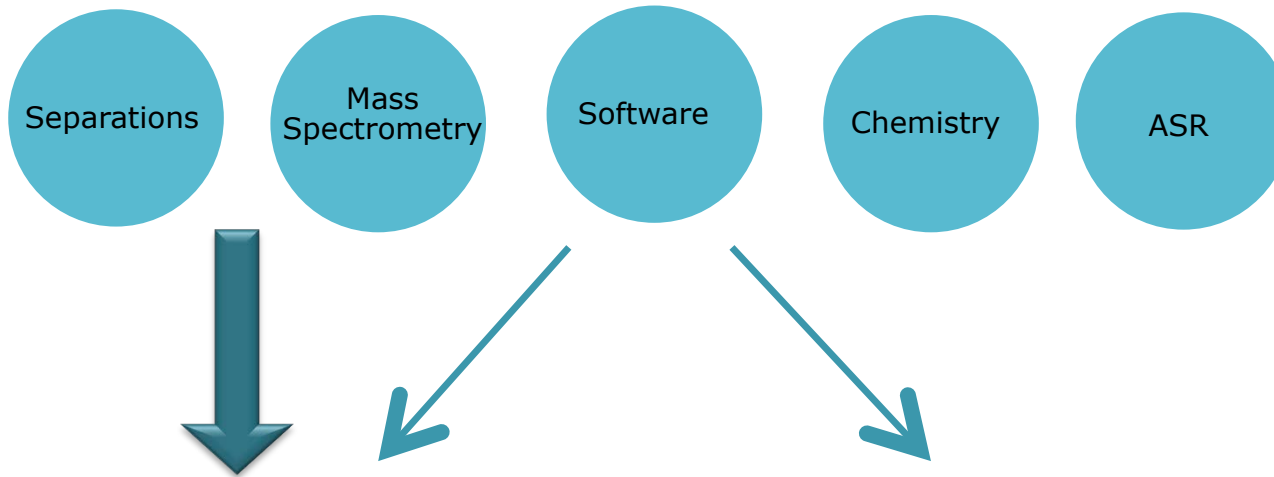

# Who is involved?

Waters  
THE SCIENCE OF WHAT'S POSSIBLE.™

and more...

## Core Competencies

### ■ Software

- Chromatography Data System
- Mass Spectrometry Systems
- Scientific Data Management System
- Electronic Lab Notebook
- Workflow Management and Lab Execution
- etc.

# Why standard formats?

Waters  
THE SCIENCE OF WHAT'S POSSIBLE.™

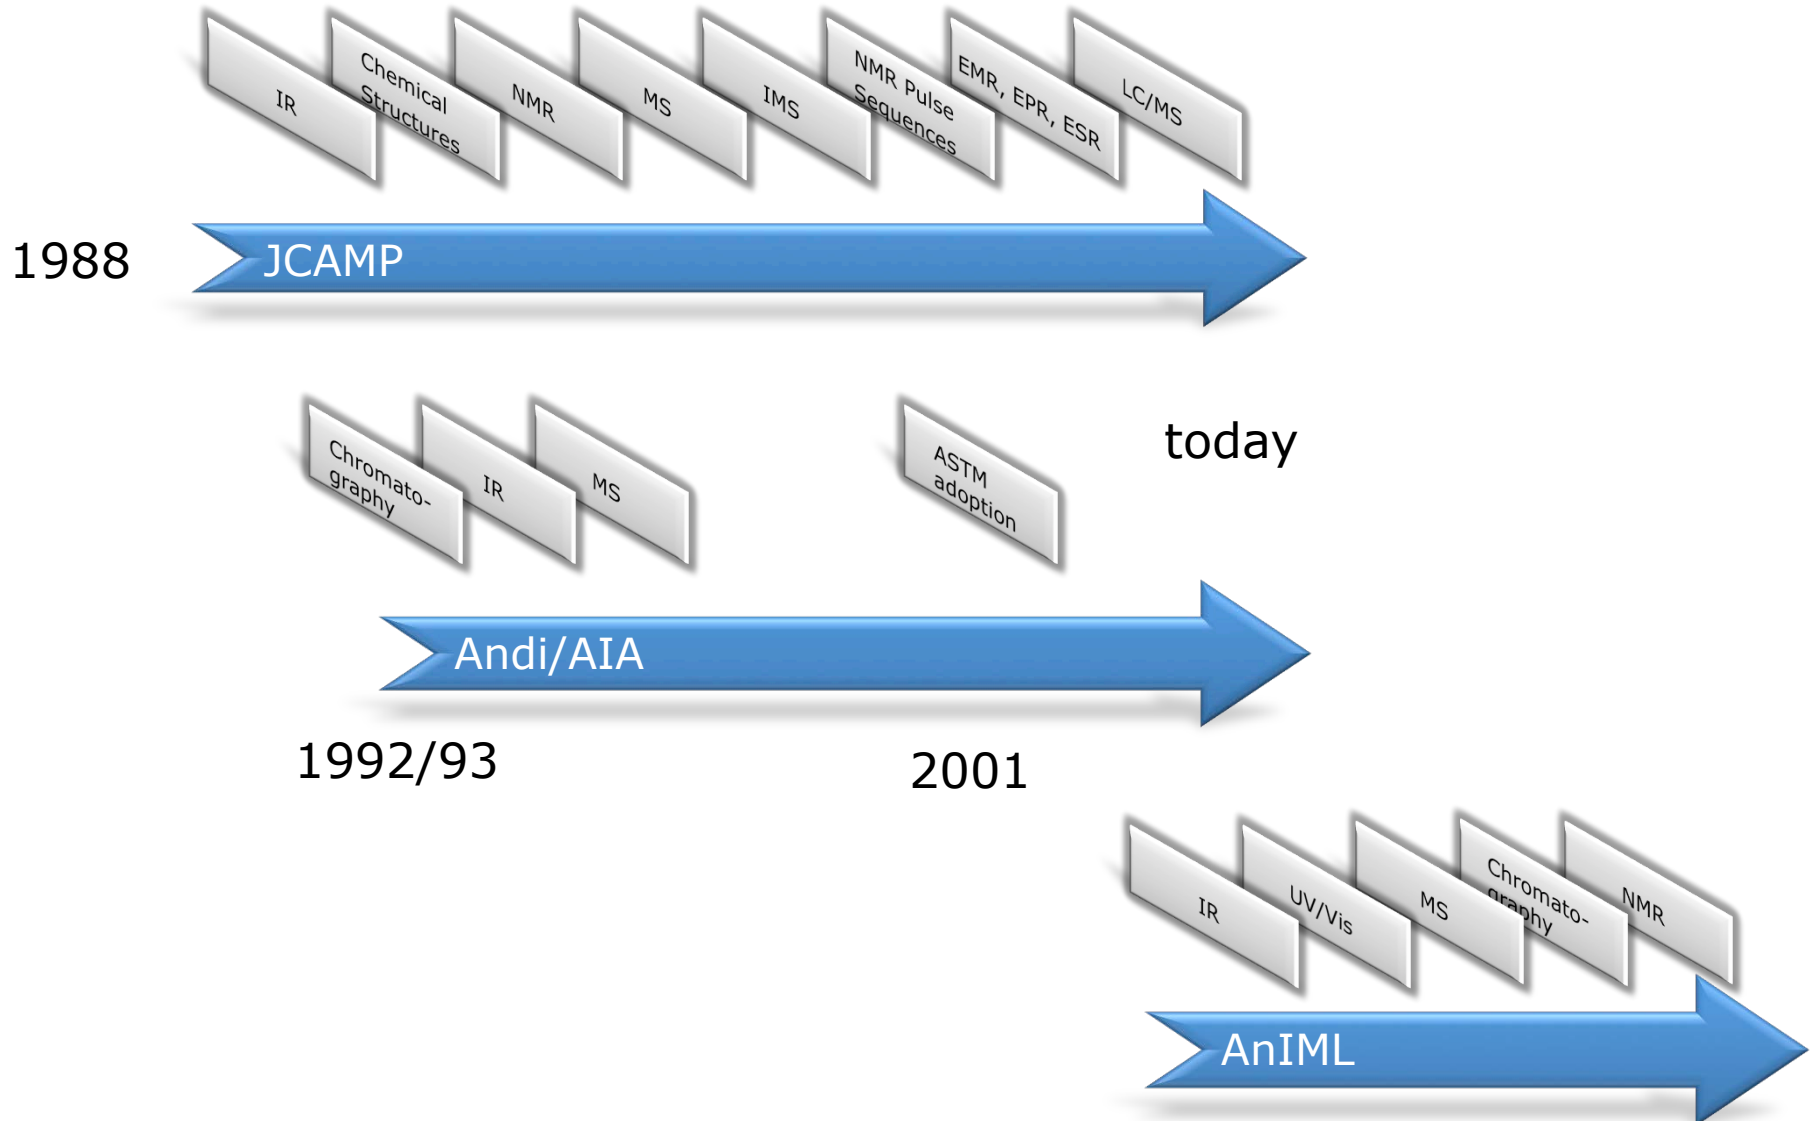

# Why standard formats?

- Goals
  - Simple
    - Intra-organization data exchange
    - Inter-organization data exchange
    - Data storage and retrieval
    - Long term archiving
  
  - Additional goals
    - Platform independence
    - Free flow of information

- Copies of Electronic Records for Inspection
  - Accessibility for Inspection
  - Integrity of Content and Meaning
  - Human Readable Form
  - Standard Portable Formats
  
- Retention and Maintenance of Records
  - GxP demands Archival of Records for Extended Time
  - Requirement to keep the Raw Data
  - Ability to Reprocess

# Current Data Standards

# Data Standard Support in Waters Informatics

- Waters software supports
  - JCAMP
  - ANDI/netCDF used in
  - mzXML
  - mzData
- Read/Write/View
- AnIML will be supported once it becomes a public standard

# Challenges in developing a new standard

- Agree on technology and structure
- Agree on data dictionaries
- Compatibility with previous standards
  - Faithful representation - Integrity of Content and Meaning
  - Allowed values
- Compatibility with proprietary formats
- Update to reflect current technology
  - Additions only!

# Challenges in developing a new standard

- Management buy-in
- Participation
- Conflicts of interest
  - Proprietary vs. open
  - Inter-vendor politics
  - Vendors vs. customers
- Resist the urge to sell

# Why AnIML?

## AnIML Data Set

Workflow Information

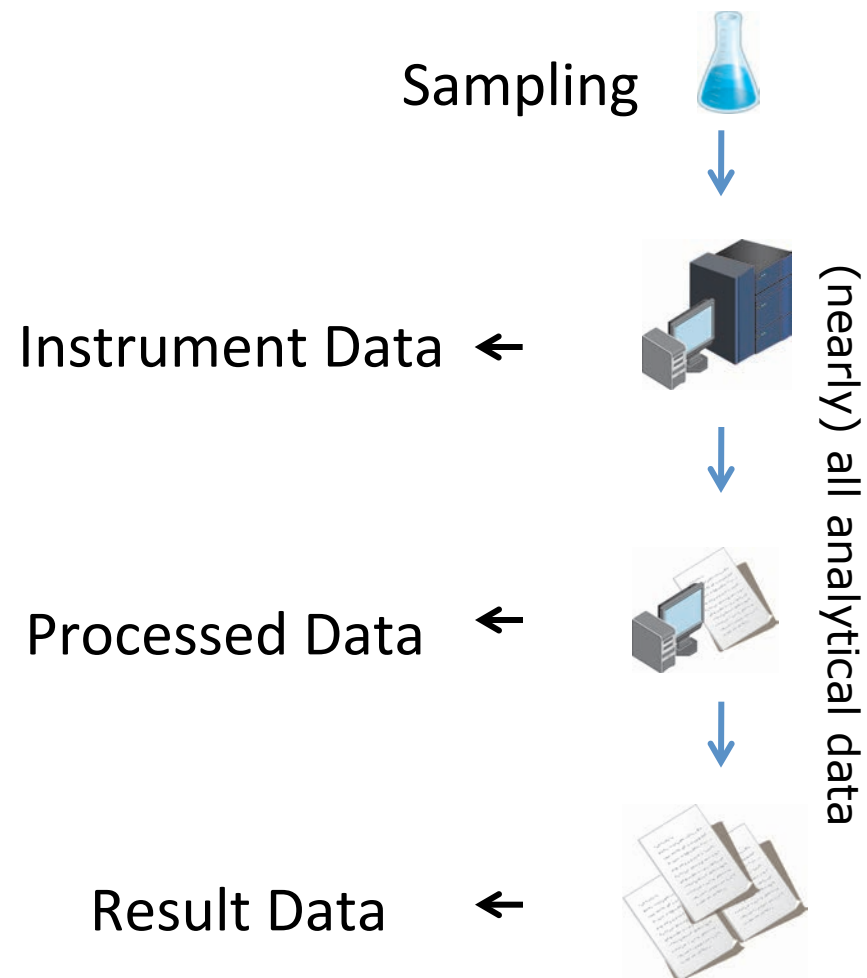

Metadata

Instrument Data

Processed Data

Result Data

Audit Trail, Signatures

# Proprietary vs. Standard Formats

- Why don't vendors use Standard Formats internally?

| Proprietary Formats             | Standard Formats                     |
|---------------------------------|--------------------------------------|
| Binary                          | ASCII-based (e.g. XML)               |
| Compact                         | Verbose                              |
| Fast to Read/Write              | Slow to Read/Write                   |
| Data Acquisition and Processing | Data Sharing and Long Term Stability |

# Vendors' Benefits

- Competitive
  - Influence on an emerging standard
  - Access to latest information
- Relationships
- Intangible Value
  - Marketing
- Expertise
